

COMMUNIQUÉ

Autumn 2004

NEW AND EXCITING

Getting in and out of the car is so easy... and so is storage.

nexus™

by Dana Douglas

GET READY FOR THE NEXT LEVEL IN MOBILITY!

Dana Douglas is pleased to introduce the next level in mobility - the new Nexus. With an ultra-compact folding system and state-of-the-art lightweight construction, getting your rollator in and out of a car will now be so much easier. The Nexus brings mobility to a new stratus. Are you ready?

- Folds like no other rollator
- Extremely compact for transportation and storage
- Lightweight - weighs only 13 lbs
- Soft cushioned seat and backstrap
- Patented cable-free braking system
- Extra large basket
- Double bearing front fork assembly for smooth rolling

WE'RE CHANGING COLOURS

Our entire walker line is getting a makeover! Not only are we updating existing colours, but are adding new accessories, and even revising frame designs with esthetically pleasing, ergonomic details such as curved backrests. And that's only the beginning! Look for many new, exciting products coming your way in 2005!

Do you have something to say? We'd be pleased to include you in our next issue of Communiqué.

DID YOU KNOW... THE INFINITI 500 IS "KEYLESS"

What?!? No key needed for adjustment...the bolt still there for complete security! With all its award-winning features such as a cable-free braking system, two-position seating, 'flip' backstrap, and sliding basket just to name a few, it's hard to believe that we can improve on an already perfect walker!
